

PORTFOLIO OBJECTIVE

This Investment portfolio comprises a wide range of collective investment vehicles, such as unit trusts, mutual funds and exchange traded funds (ETFs), whose underlying objectives aim to match or outperform their respective target markets. Asset classes you could find in this portfolio are equities, government bonds, corporate bonds, alternative investments, commodities and cash. Absolute return, multi-asset, and property may feature within the alternatives classification. The Investment portfolio seeks to generate capital growth over the medium to long term, typically 5 years or more, by employing a dynamic investment strategy. Investment portfolios will typically comprise 60% equity and 40% non-equity assets, though weightings may deviate within set parameters, allowing managers to react to market conditions.

KEY INFORMATION

Portfolio Benchmark	IA Mixed Investment 40-85% Shares
Portfolio Manager	James Penny
Inception Date	01/01/2010
AUM (est.)	£80.7m
Minimum Investment	Any size
TAM AMC	0.30%
Underlying OCF (est.)	0.50%
Bond Duration (est.)	3.61 yrs
Yield (est.)	0.89%

REVIEW

The first half of 2026 once again demonstrated the remarkable resilience of global markets. Despite heightened geopolitical tensions in the Middle East, renewed inflation concerns and ongoing uncertainty around interest rates, global equities continued to climb to fresh highs. Investors consistently looked beyond short-term headlines, focusing instead on strong corporate earnings and the long-term opportunities presented by Artificial Intelligence. Importantly, this year's rally has been driven more by improving company profits than by expanding valuations, providing a healthier foundation for equity markets than many previous advances. Beneath the surface, however, markets became increasingly selective. Leadership shifted away from the familiar technology giants towards companies supplying the infrastructure underpinning AI, while bond markets endured a much more challenging period as investors demanded higher yields in response to inflation and rising government borrowing. These sharp rotations between sectors and asset classes reinforced the value of active management, with diversification proving increasingly important in navigating a more fragmented investment landscape.

PORTFOLIO ACTIVITY

Performance for the active range was mixed over June as models with more equity exposure, such as growth and Adventurous powered forward under a rallying equity market with investments in US value, quality stocks & Asian markets making good gains. Likewise, TAM's investments into Latin American stocks and more active stock picking funds suffered some headwinds as investors rotated away from these areas. On the bond side of the book things looked good with Gilts and strategic bonds both delivering absolute performance to investor performance. Major laggards in the month came from commodities and precious metals both of which are present in greater quantities within the lower risk models such as defensive & cautious. Commodities broadly suffered from their oil exposure which continued to trade down to \$70 whilst gold continued to be buffeted by increasing speculation on rising rates under a more hawkish federal reserve and a resurgent dollar over the month of June.

MARKET OUTLOOK

Looking ahead, we remain constructive on the outlook for markets, although we expect the journey to become more volatile as markets become increasingly expensive. Corporate earnings remain supportive; inflation appears to be gradually moderating and investor sentiment continues to favour equities. However, geopolitical tensions, energy prices and the outlook for interest rates are likely to create periods of uncertainty, particularly as markets have already priced in a great deal of optimism. We therefore expect opportunities to emerge alongside bouts of volatility rather than a smooth path higher.

For client portfolios, our focus remains on maintaining broad diversification whilst actively identifying the next areas of long-term opportunity. Artificial Intelligence continues to represent a transformational investment theme, but we are also finding attractive value across healthcare, industrials, infrastructure, real assets and selected fixed income markets. In an environment where market leadership is becoming increasingly fragmented, we believe disciplined active management, combined with a diversified investment approach, remains the most effective way to help clients achieve their long-term financial goals.
