

GROWTH PORTFOLIO

30th JUNE 2020

OBJECTIVE

In contrast to our portfolios of active investment products, this TAM Passive portfolio comprises solely of passive investment vehicles (such as unit trusts and exchange traded funds) that simply track a market and aim to deliver returns reflective of how that market is performing. Asset classes you could find in this portfolio are government bonds, corporate bonds, alternatives and cash. Property and exchange traded commodities may all feature within the alternatives classification.

Passive Growth seeks to generate higher capital growth over the medium to long-term by employing a more dynamic investment strategy. The portfolio will have a higher exposure to equities compared to Passive Balanced - typically comprising of 70% equity and 30% non-equity - though weightings may deviate within set parameters, allowing managers to react to market conditions.

CURRENT ASSET ALLOCATION

*Property and exchange traded commodities may all feature within the alternatives classification
