

## DEFENSIVE PORTFOLIO

30<sup>th</sup> SEPTEMBER 2018

## OBJECTIVE

In contrast to our portfolios of active investment products, this TAM Passive portfolio comprises solely of passive investment vehicles (such as unit trusts and exchange traded funds) that simply track a market and aim to deliver returns reflective of how that market is performing. Asset classes you could find in this portfolio are government bonds, corporate bonds, alternatives and cash. Property and exchange traded commodities may all feature within the alternatives classification.

Passive Defensive seeks to generate modest returns higher than cash in the bank over the medium term with potential for consistent though constrained capital growth. The portfolio has a more defensive approach to equity exposure compared to Passive Cautious - typically comprising of 15% equity and 85% non-equity - though weightings may deviate within set parameters, allowing managers to react to market conditions.

## CURRENT ASSET ALLOCATION

\*Property and exchange traded commodities may all feature within the alternatives classification

## GEOGRAPHICAL EXPOSURE

## PERFORMANCE SUMMARY\*

	1 Year	3 Year	5 Year		
	0.02%	5.23%	8.57%		
	Calendar Year Returns			Annualised*	
	2016	2017	2018	Return	Volatility
	3.66%	0.98%	0.23%	1.66%	1.85%

\*Launched in 2017, our TAM Passive performance figures quoted have been simulated for illustrative purposes only. Figures quoted are proforma, assuming the portfolio had tracked the FTSE All-Share and FTSE UK GILTS up to 5 Year indices as closely as possible, minus TAM fees. Data sourced from FE Analytics and calculated on the assumption that the current portfolio model was held from 1st January 2012. Annualised performance numbers are based on the historical 5-year data. Simulated past performance is not necessarily a guide to future returns. The value of investments, and the income from it, may go down as well as up and may fall below the amount initially invested.
